Academic literature uses the abstract to succinctly communicate complex research.

An abstract may act as a stand-alone entity instead of a full paper. As such, an abstract is used by many organizations as the basis for selecting research that is proposed for presentation in the form of a poster, plenary oral presentation or workshop presentation at an academic conference. Most literature databases search engines index only abstracts rather than providing the entire text of the paper. Full texts of scientific papers must often be purchased because of copyright and/or publisher fees and therefore the abstract is a significant selling point for the journal or electronic database. An abstract may act as a stand-alone entity instead of a full paper.

SUMMARY

Marc Marquez says the crash that brought his Moto GP win streak at Austin to an abrupt end was hard to understand because he was not pushing to the limit.
Having established a gap over second-placed Valentino Rossi of 3.8 seconds, Marquez undid his hard work with a low-side crash at Turn 12 just shy of half-distance and was unable to continue.
Rossi went on to finish second behind Suzuki rider Alex Rins, who scored his first Moto GP win, while Andrea Dovizioso moved to the head of the riders standings by finishing fourth.
Marquez denied a suggestion made by third-place finisher Jack Miller that the Honda rider had pushed too hard in the early laps to break away from the pack and was struggling with an overheating front tyre.
When that was put to him, Marquez responded: Its what I said, on data already we compared and it was very similar to my fastest lap and to other laps.
